The following Magazines and Periodicals are circulated amongst the Members:—

Quarterly Journal of Microscopical Science
Journal of Science
Popular Science Review
Nature
Geological Magazine
Lancet
Scientific American
The Academy
Botanical Magazine
Gardener's Chronicle
Chemical News
Engineering
Science Gossip
Electrical and Telegraphic Review
Journal of the Society of Arts
Annals and Magazine of Natural History

WINTER SESSION, 1881.

Meetings will be held on the following Monday Evenings:—

JUNE 13	SEPTEMBER 5
JULY 11	OCTOBER 3
AUGUST 8	NOVEMBER 7

To commence at 7.30 p.m.

EXTRACTS FROM THE RULES.

1.—Any person desiring to become a member of the Institute, shall be proposed in writing by two Members, and shall be balloted for at the next meeting of the Council.

2.—New Members on election to pay One Pound One Shilling Entrance Fee, in addition to the usual Subscription of One Pound One Shilling, the Annual Subscription being payable in advance on the first day of April for the then current year.

3.—Members may at any time become Life-Members by one payment of Ten Pounds Ten Shillings, in lieu of future Annual Subscriptions.

AIM Ann Report 1880 to 1881

AIM Ann Report 1880 to 1881

REPORT.

THE Council of the Auckland Institute have now to present to the members a report on the operations and condition of the Institution during the past year.

Thirty additional members have been elected since the last annual meeting. Three names have been removed by death, five have been transferred to other branches of the New Zealand Institute, while seventeen members have either left the colony or ceased to subscribe. The total number on the register is now 277.

The ordinary meetings for the reading of papers have been held as usual, and were fairly attended. With the view of attracting attention to the Society, and possibly adding to the list of members, the Council arranged for the delivery of a series of popular lectures by various gentlemen, to alternate with the regular meetings. The attendance at the lectures was remarkably good, and much public interest was evinced in them; but the Council regret to state that they have not been the means of so largely adding to the number of subscribers as was anticipated. The following is a list of both the lectures and the papers read:—

1. Affghanistan and Central Asia:—by the Right Rev. W. G. COWIE, D.D., Bishop of Auckland.
2. Chromatics, the New Science of Colour:—by J. MARTIN, F.G.S.
3. Edgar Allan Poe—a Study in Morbid Psychology:—by E. A. MACKECHNIE.
4. On the Larva of *Lasiorhynchus*:—by CAPTAIN T. BROUN.
5. On the Fertilisation of *Thelymitra*:—by T. F. CHEESEMAN, F.L.S.
6. Stray Notes on Art and Literature:—by ALBIN MARTIN.
7. Progress of the Russians in Central Asia:—by the Hon. COL. HAULTAIN.
8. On the Larva of *Ceratognathus*:—by CAPTAIN T. BROUN.
9. Description of new species of Nudibranchiate Mollusca:—by T. F. CHEESEMAN, F.L.S.

AIM Ann Report 1880 to 1881

10. On Runes :—by NEIL HEATH, F.G.S.
11. On Explosives :—by J. A. POND.
12. Names of Places, their origin and meaning :—by the Rev. J. BATES.
13. On a new genus of Opisthobranchiate Mollusca :—by T. F. CHEESEMAN, F.L.S.
14. On the Spontaneity or Self-action of the Will, as opposed to all doctrines of Necessity :—by the Rev. S. EDGER.
15. Egyptian Lights upon the Exodus of Israel :—by R. C. BARSTOW, R.M.
16. A Day on the Ice around Mont Blanc :—by NEIL HEATH, F.G.S.
17. On a new species of *Loranthus* :—by T. F. CHEESEMAN, F.L.S.
18. On the growth of Sugar Beet in New Zealand :—by DR CURL.
19. On the neglected Forest Products of New Zealand :—by T. KIRK, F.L.S.
20. On some indications of change in the level of the coast line in the north part of the North Island of New Zealand :—by S. PERCY SMITH.
21. On Heredity :—by E. A. MACKENZIE.

The twelfth volume of the "Transactions of the New Zealand Institute" has been printed during the year, and copies have been duly issued to the members. It is a matter for congratulation that the attempt made in Parliament to strike out the grant of £500 for the printing of the "Transactions" was defeated, and that the issue of vol. xiii. is thus rendered certain.

It is satisfactory to report that the number of visitors to the Museum continues to increase, and that the public interest evinced in it has undergone no abatement. As in former years, the Council have to acknowledge the receipt of a large number of additions and donations, full particulars of which will be found appended. Those of special interest will be briefly alluded to in the following resumé of the work performed in the Museum during the year.

VERTEBRATA.—The most important addition in this class is a series of birds and mammals from the higher portions of the Swiss Alps, forwarded in exchange by the Geneva Museum. The collection of skeletons of vertebrates, mentioned in last year's

AIM Ann Report 1880 to 1881

.9

report as having been just received from the Royal College of Surgeons, has been unpacked and arranged in the Museum. Several interesting New Zealand birdskins have been presented by Messrs F. H. Combes, E. A. Plumley, and others. A temporary engagement has been made with the well-known taxidermist, Mr A. Reischek, and a large proportion of the skins that have been accumulating for the last few years has been already set up. The Council have pleasure in mentioning that this is principally due to the liberality of Mr J.C. Firth, who kindly forwarded a cheque for £25 at a time when it was doubtful whether the Institute would be able to devote any of its own funds to the purpose.

INVERTEBRATA.—The collections forwarded by the Geneva Museum include excellent sets of European Hemiptera and Hymenoptera. As the species are accurately named by specialists, they will doubtless prove most valuable when the New Zealand forms of these groups come to be studied. A large series of North American Lepidoptera, presented by Captain Elliott, also deserves special notice. During the year the whole of the foreign shells contained in the Museum have been carefully examined, and 1,200 species have been selected and mounted as a type collection. The New Zealand shells have also been re-arranged. Space for the proper exhibition of both collections has been obtained by the erection of a large table-case along the whole length of the south gallery, the cost of this, £50, being defrayed by a few friends of the Museum, as stated in the report for last year.

GEOLOGY AND MINERALOGY.—There are no additions of special importance under this heading, although numerous small donations have been received. The type collection of rocks purchased in London some years back has at last been arranged and placed in the Museum; but from the want of proper cases both it and the type collection of minerals can only be very imperfectly displayed.

CONVERSAZIONE.—With the view of raising funds for the engagement of a taxidermist, the Council determined to give a Conversazione during the month of September last—charging a moderate fee for admission. As the entertainment is doubtless fresh in the memory of most of the members, it will be sufficient to state that it was attended with a greater measure of success than was anticipated, the two evenings yielding over £60 after

AIM Ann Report 1880 to 1881

10

payment of expenses. The thanks of the Institute are due to the numerous ladies and gentlemen who kindly gave their assistance.

ENDOWMENT.—The question of a landed endowment for the Museum has repeatedly engaged the attention of the Council, and the subject has been brought by them before the Waste Lands Board. The Board has favourably recommended the matter to the notice of the Government; and it is hoped that some action may be taken during the next session of Parliament. With the limited revenue of the Institute, it every year becomes more difficult to provide for the rapidly increasing collections, while it is altogether hopeless to expect that the necessary fittings and requisites can be provided, and the Museum made of real use as an educational institution. The Council trust that the Auckland members of Parliament will use their best endeavours to place their Museum on a footing of equality with similar institutions in the Southern provinces, for which, as is well known, ample provision has long since been made.

LIBRARY.—The scientific and reference library of the Institute is fast attaining respectable proportions, and now contains over 1,400 volumes of well-selected works. During the year a grant of £57 10s. has been received under the provisions of the Public Libraries' Subsidies Act. This amount has been expended in the purchase of standard scientific works, now on their way from London. The Council have especial pleasure in drawing attention to a most valuable donation received from Mr J. T. Mackelvie, consisting of a complete series of the publications of the Royal Agricultural Society, and a set of the Proceedings of the Zoological Society from their commencement in 1830 up to 1866; in all seventy-five volumes. Mr Mackelvie's frequent, and always valuable and appropriate donations, both to the Museum and library, have certainly entitled him to the warmest thanks of the Institute. Mention should also be made of a complete set of the publications of the Novara Expedition, obtained through the kind offices of Dr Hochstetter and Dr C. F. Fischer. The Provincial Council Library has at length been removed to form the nucleus of a general library for the people of Auckland. The Council have to acknowledge the receipt of £50 from the City Council as some reimbursement for the expense of maintaining the library

AIM Ann Report 1880 to 1881

II

during the four years that it has been under the care of the Institute.

FREE SCHOOL OF ART.—Thanks to the continued and enlightened liberality of Dr Campbell, who defrays all expenses, the School of Art established in the Institute Buildings with the view of enabling the public to take full advantage of Mr Russell's presentation of statuary has been kept up during the year. There has been a full attendance of students, and the instructor reports that the progress made is most encouraging.

In conclusion, the Council wish to tender the thanks of the Institute to those donors to the Museum and Library not mentioned in the body of the report, but whose names will be found recorded in the appended list of donations. Thanks should also be accorded to Messrs W. K. Graham & Co. and Mr Hugh Craig, for their valued services as agents of the Institute in London and San Francisco respectively; also to the Pacific Mail Steamship Co., the New Zealand Shipping Co., and Messrs Shaw, Savill and Co., who have, for some years past, carried freight free all packages intended for the Institute.
